

THE STATE-OF-THE-ART IN SPEED, QUALITY, AND PERFORMANCE

CANON IMAGEFORMULA DR-X10C

The robust Canon DR-X10C brings high-speed, high-volume document scanning to a whole new level of efficiency.

BUILT TOUGH AND FULLY EQUIPPED FOR PRECISION HIGH-VOLUME SCANNING

Introducing the DR-X10C, Canon's top-of-the-line DR model built for high-speed, high-volume document scanning. This powerful scanner offers enhanced speed, image quality, and reliability to handle the most demanding of processing jobs – quickly, easily, and smoothly. Incorporating state-of-the-art imaging technology with operator-friendly design features in a durable, compact unit, it's the ultimate solution for quality production-level scanning.

- High-speed A3 colour duplex mid-volume production scanner
- 100 ppm / 200 ipm at 200 dpi in colour, grayscale, or black-and-white
- Dedicated image processing chip for fast image processing
- 5 levels of roller torque control, plus 3 ultrasonic sensors with multi-zoning capability
- The industry's first dust-free scanning system – 3 steps to cleaner, clearer images
- Dedicated sensor for accurate page size detection and skew correction – another industry first
- User-friendly design features, including intuitive control panel with job function
- Robust and durable, with a 60,000 sheet daily duty cycle
- Diverse hardware and software options

SUPERB CANON IMAGE QUALITY AND SPEED

The Canon DR-X10C delivers unrivaled image quality and scanning speed, plus diverse output formats such as searchable PDF in resolutions up to 600 dpi. Unique to the DR series is its selectable background – the colour can be switched between white and black to suit particular document types and applications.

Features

- Auto Colour Detection
- Auto Page Size Detection
- Deskew
- Skip Blank Page
- Text Orientation Recognition
- Colour Dropout (R/G/B/Custom)
- Moiré Reduction
- Prevent Bleed Through / Remove Background
- Punch Hole Removal
- MultiStream™

Rapid, high quality scanning

Images can be continuously captured at a rate of 100 pages per minute or 200 images per minute in colour, grayscale, or black-and-white (A4/LTR, 200 dpi, portrait). Onboard JPEG compression is available for larger files for reduced transfer time to your PC.

Dedicated, onboard image processing chip

The scanner maintains its high scanning speed even with multiple image processing functions selected thanks to hardware image processing. Functions are processed by the onboard chip rather than the connected PC for minimal speed deterioration.

3-line CMOS image sensor technology

The scanner employs dual 3-line CMOS contact image sensors for unrivalled document scanning speed, image sharpness, and tonal accuracy. Resulting images are true to the original document – free of unwanted colour staining that affects conventional scanners.

3-step dust prevention method for clean, clear images

The DR-X10C combats paper dust with a revolutionary 3-step approach that prevents particles from accumulating and adhering on the sensor glass. This dust-free scanning system ensures that images are clear of artifacts while greatly minimizing the need for manual cleaning.

Automatic scanner calibration

Shade Correction is an automatic scanner calibration process that ensures uniform, consistent image quality and tonality from page to page. Prior to each scan job, the image sensor shifts within the scanner to calibrate itself against a special white shading surface.

Advanced image processing

The scanner offers a host of image processing functions that optimise the readability of documents and minimise pre- and postprocessing by the operator.

SCANNER FEATURES

Auto power on/off synchronizing

The DR-X10C can be synchronized to automatically turn on and off according to the status of the connected PC when connected via USB. Manual power on and off, of course, is available. What's more, the scanner's cover/feed tray automatically opens at power on.

Storage box

The output tray of the scanner features two built-in pockets in which consumables (such as an ink cartridge for the optional imprinter) and the supplied cleaning cloth can be stored for easy access.

Shown with cleaning cloth

High volume feeder

The motorized paper feed tray can be set to one of three height positions according to the volume of a typical batch, which helps minimise the wait time before scanning begins. Each position accommodates up to approximately 100, 300, and 500 sheets, respectively.

Highest position

Middle position

Lowest position

Flexible paper guides

The paper feed guides can be moved independently and locked into place to accommodate diverse scanning positions. The output guides, too, can be set freely to match.

Edge-aligned

Center-aligned

Eject brake

Scanned documents are neatly stacked in the output tray thanks to an improved braking mechanism that controls the speed of document output, which greatly reduces the need for the operator to gather and align the pages him or herself.

Intuitive control panel

Start and stop scanning, select preregistered scan jobs, check displayed messages, and make select scanner settings using the control panel on the machine.

Job key

Job functionality enables the operator to select and execute up to 99 preregistered scan jobs directly from the DR-X10C control panel without having to use a scanning application. Jobs – which consist of a set of scan settings, relevant image processing functions, image file format, and save destination – are assigned using the included Job Registration Tool.

Tough, durable construction

The robust DR-X10C features a solid body and durable roller system to handle the demands of production-level scanning. Its daily duty cycle is rated at 60,000 sheets per day.

Compact, ergonomic design

The DR-X10C is the most compact and lightweight scanner in its class* and features an ergonomic, streamlined design that adds to operator handling comfort.

* As of November 2007

Bundled software

Capture Perfect

CapturePerfect is Canon's own scanning application that makes it easy to get great scans straight out of the box. Through a user-friendly interface, the software gives you a wide choice of file saving formats and file distribution options such as searchable and encrypted PDF, Scan to Mail, Scan to Presentation, and more.

DIVERSE OPTIONS

Pre-/Post-Imprinter

Print up to 32 characters of text on the front of documents, pre- or post-capture, as they are fed through the scanner with an optional built-in ink-jet imprinter. Two types of imprinter and various ink colours are available to suit your needs.

Barcode Module III

This add-on software module enables the scanner driver to recognize scanned barcodes.

Patch Code Decoder

This hardware option enables the scanner to automatically separate files whenever a patch code is detected on documents or function sheets.

SUPERIOR PAPER HANDLING AND RELIABILITY

The 500-sheet capacity DR-X10C features Canon's renowned high-precision roller system and page separation mechanism for reliable batch scanning in a variety of automatic and manual feeding modes. Multiple functions and built-in sensors ensure efficient, reliable handling and capture, plus strong protection against double feeds.

Smooth feeding of a wide variety of documents

The DR-X10C delivers smooth, jam-free feeding of a wide variety of documents – including mixed batches and non-standard documents – from business card size up to A3 (11 x 17 in.)*. Active Torque Control lets you adjust roller torque to accommodate otherwise difficult-to-feed paper types such as especially thin or thick documents, in five levels of adjustment.

* Up to A1 (23.4 x 33.1 in) using Folio scanning method and Long Document Mode

All-new Double Feed Retry mechanism

In the rare event that a double feed occurs, the Double Feed Retry function returns the document pages to the feeder inlet and retries scanning up to three times before pausing document transport, dramatically reducing the need for operator intervention.

3 ultrasonic double feed sensors, with “multi-zoning” capability

Three ultrasonic sensors provide protection against double feeds by detecting and preventing overlapping pages from being fed into the scanner at the same time. Each sensor can be set to ignore or detect specified areas of a document to accommodate pages with labels or attachments.

Ultrasonic Double Feed Detection

Sensor positions

Dedicated sensor for document size and angle detection

While conventional scanners rely on their image sensor to detect a document's size and angle, the DR-X10C is equipped with a dedicated sensor for this purpose to provide exceptional Page Size Detection and Deskew accuracy and processing speed.

Image sensor

Dedicated sensor for Page Size Detection and Deskew

Unmatched reliability
and handling ease,
beautifully engineered

Staple detection sensors

Canon's Staple Detection feature automatically halts the scanning process when an unremoved staple is detected. Left undetected, staples could cause errors that compromise the document, cause jams, or damage the device.

Rapid Recovery System

If scanning is interrupted due to a misfeed, the scanner's Rapid Recovery System ensures that only completed image data is transferred to the application software – the “bad” data is not sent – so the operator can simply correct the error and seamlessly resume scanning.

Verify Scan & Count Only modes

Verify Scan mode allows operators to confirm that all the pages in a batch are scanned by comparing a document hard count with the number of scanned pages. Count Only mode doesn't scan the documents and performs just a hard count of pages.

Specifications

Type	Desktop sheetfed scanner
Document Feeding	Automatic or manual sheet feeding
Document Size	Width: 50.8 - 305 mm (2 - 12.01 in.) Length: 70 - 432 mm (2.76 - 17.01 in.)
Document Thickness and Weight	Automatic feeding: 0.06 - 0.15 mm, 52 - 128 g/m ² (14 - 32 lb bond) Manual feeding: 0.05 - 0.30 mm, 42 - 255 g/m ² (11 - 64 lb bond)
Feeding Capacity	Up to 500 sheets of good quality paper (48 mm or less including page curl)
Scanning Element	3-line CMOS CIS
Light Source	LED (red, green, and blue)
Scanning Side	Simplex / Duplex
Other Functions	Folio scanning, double feed detection release, separation retry
Scanning Modes	Black and White, Error Diffusion, Advanced Text Enhancement, Advanced Text Enhancement II 256-level Grayscale 24-bit Colour
Scanning Resolutions	100 x 100 dpi, 150 x 150 dpi, 200 x 200 dpi, 240 x 240 dpi, 300 x 300 dpi, 400 x 400 dpi, 600 x 600 dpi
Scanning Speed* (A4/LTR, 200 dpi)	Portrait: Black and White: 100 ppm (Simplex) / 200 ipm (Duplex) Grayscale: 100 ppm (Simplex) / 200 ipm (Duplex) Colour: 100 ppm (Simplex) / 200 ipm (Duplex) Landscape: Black and White: 128 ppm (Simplex) / 256 ipm (Duplex) Grayscale: 128 ppm (Simplex) / 256 ipm (Duplex) Colour: 128 ppm (Simplex) / 256 ipm (Duplex)

Useful Functions	Job Function, Ultrasonic Double Feed Detection, Staple Detection, Selectable Background Colour, Dust Countermeasures, Auto USB Power Switching, Auto Colour Detection, Moiré Reduction, Prevent Bleed Through / Remove Background, User Registration, Skip Blank Page, Auto Page Size Detection, Deskew, Batch Separation, Text Orientation Recognition, Black Border Removal, Punch Hole Removal, Folio, Long Document Mode, Colour Dropout / Enhancement (R/G/B/Custom), MultiStream™
Interface	Dual Interface (SCSI-3 & High-Speed USB 2.0)
Software	ISIS/TWAIN Driver, Job Registration Tool, CapturePerfect 3.0
Power Requirements	AC 100V (50/60Hz), AC 120V (60Hz), AC 220-240V (50/60Hz)
Power Consumption	Scanning: 125W Sleep mode: 4.2W (AC 220-240V: 4.5W) Power Turned Off: 0W
Operating Environment	10 - 32.5°C (50 - 90.5°F), Humidity: 20 - 80% RH
Dimensions (W x D x H)	528 x 563 x 375 mm (20.79 x 22.17 x 14.77 in.), with trays closed
Weight	Approx. 39 kg (86 lb.)
Options	Pre-Imprinter Unit, Post-Imprinter Unit, Patch Code Decoder, Barcode Module III
Consumables	Exchange Roller Kit (Feed roller, Retard roller, Pick roller), Cleaning Sheets (30), Ink Cartridges for Imprinter (blue, red, or green)

* Maximum hardware speed. Actual scanning speed may vary depending on data transfer time and your system configuration.

The Canon DR-X10C conforms to ENERGY STAR standards for energy efficiency.

Easy Maintenance

The DR-X10C is durable and easy to keep in top scanning condition. A user-installable Exchange Roller Kit (sold separately) is available for replacing worn rollers – no service technician is required. If your scanner's image sensor glass gets scratched or damaged for any reason, it can be replaced with Sensor Glass Exchange (sold separately). Sensor glass must only be replaced by certified service technicians.
